

Risk Management for Everyone

Modernise risk. Make it an easy, engaging and integrated part of everyone's day job.

Help your managers to identify risks and mitigate issues before they happen and to deploy the right actions when they do.

- ✓ Make risk relevant, easy and simple for every user.
- ✓ Take the pain out of risk regulation.
- ✓ Be crisis ready.
- ✓ If an action has to happen, make sure it does.

Ensure Maximum Compliance.

Plan, prepare and be risk ready. Take the lead and give everyone clear, concise instructions on what to do when risks occur.

“...we have seen individuals and service areas utilise the system more effectively in decision making, using the system to manage risk and being more proactive in terms of managing that risk.”

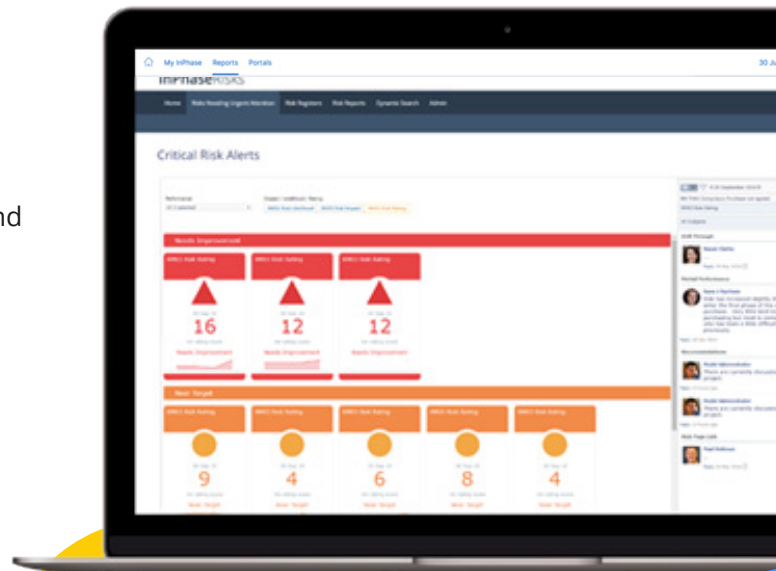

Paul Flint
Senior Risk & Performance Management Officer
Newport City Council

Make the world a safer place

Health providers and regulated bodies have the greatest impact on people. Use the best-in-class software for assured governance, risk and compliance.

The risks they face can have more wide-ranging effects, and they can be catastrophic if they happen. **Rock Star** Risk Managers use InPhase to ensure:

- ✓ Better awareness of risk
- ✓ Radically reduced risk of failure
- ✓ Prioritised risks and associated spend
- ✓ Continually predicted risks and lessen their effects

Keep all your work under one roof...

...with fully aligned governance, risk and compliance software.

Detached risk registers are ineffective, so the risks to your strategies, projects, actions, KPIs and audits need to be considered holistically.

InPhase helps you clearly see where the actions to mitigate one risk can drive success in other areas, so you can capture risks with confidence and tackle them with less effort.

Name	Per Actual	Per Target	Per Var%	Per	YTD Actual	YTD Target	YTD
Increased competition	6.00	4.00	50.00	▲	6.00	4.00	▲
Interest/Inflation Rate Change	4.00	4.00	0.00	▲	2.67	4.00	●

Plan, execute and manage your operational readiness with ease.

More Engagement

- Ensure everyone can see how they contribute
- Help users collaborate to share collective insight
- Give praise and congratulate people on a job well done

More Clarity

- Collate all risk information into one place for one holistic view
- Generate clear actions focused on clear results
- Help users prioritise risk-related actions to focus on the important stuff

More Resilience

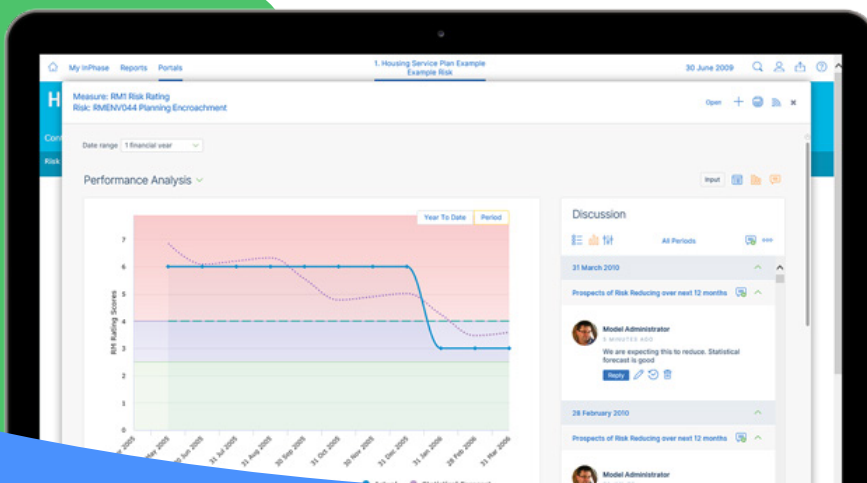

- Respond instantly to changing priorities, risks, policies, and plans
- Work easily from any location or device
- Use real-time data to adapt and stay on course to your goals
- Automate your action management, escalation and succession

Allan Oldfield
Chief Executive
Fylde Borough Council

“ The software has exceeded our expectations, using the easy-to-use features we have been able to embed all our Performance Measures, Service Plans, Audit and Risk actions to capture service delivery requests ‘once then use numerous times’ reducing duplication. ”
