

Premises Assurance Models – The Easy Way

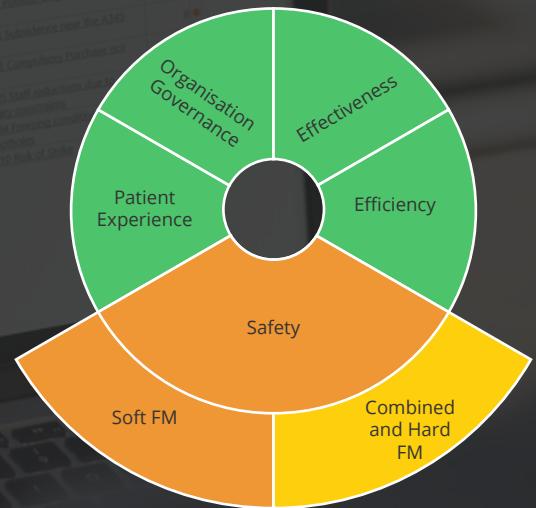

Modernise your Premises Assurance Model process.

The NHS Premises Assurance Model (NHS PAM) states that the NHS estate and its related services are integral to the delivery of high-quality clinical care, so it's essential that the NHS provides a safe, high quality and efficient estate.

That's why the InPhase PAM module gives you a powerful, integrated digital performance management solution for a unified, holistic view of your entire PAM process.

- ✓ Save valuable time, effort and manpower.
- ✓ Enable easier, better collaboration within teams and departments.
- ✓ Seamlessly integrate your self-assessment, quality assurance, auditing, inspections, risk assessments, and more.

Premises Assurance Model

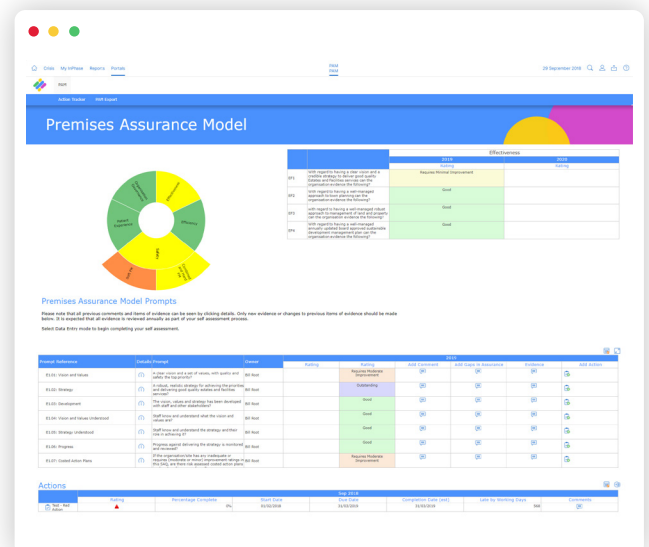

Andrew Bingham
VP Customer success
InPhase

“InPhase is the fastest, easiest and most cost-effective way to manage premises assurance across the Trust and ensure that your estate is safe, high quality and efficient. It takes the pain out of pulling together all the evidence you need, and it effortlessly ties everything together with the rest of your risks and related actions to give you complete oversight in one place.”

Always Up to Date

InPhase Oversight's PAM module supports all the regulatory requirements for inspection and auditing of your Trust's estates and facilities. We update the national guidance for regulatory inspections within Oversight regularly, so it can keep supporting you as the operating environment changes around you. What's more, its built-in capability to perform analysis against previous audits means that you can track progress and add or reallocate additional resources more easily than ever.

- ✓ Achieve better, safer, more accurate results with fewer resources.
- ✓ Assess collated evidence more meaningfully and holistically for greater assurance.
- ✓ Easily see your progress against objectives – clearly and in real-time.
- ✓ Give everyone fully interactive oversight of all activity with a simple visual interface.

Customised Information, at a Glance

All the SAQ assessments are colour-coded to indicate “inadequate, requires minimal improvement, requires moderate improvement, good and outstanding” status, making it easy to see at a glance those areas, and their related actions which need attention. It’s a clear visual interface that helps users prioritise their efforts and focus precious resources on working towards the overall organisational goals.

InPhase’s PAM module provides each individual user with their own ‘My portal’ to display only the key actions, risks, projects, or audit-related activities that are relevant to them.

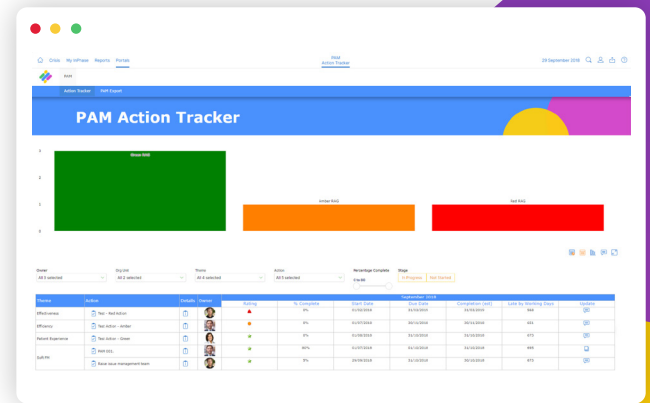

Easy Action Tracking

Monitor all activity at a glance to easily visualise which members of the team have the highest workload or priority objectives to complete.

As each prompt is progressed or completed, actions or tasks can be created and assigned to team members and viewed at the prompt, SAQ or domain level, or on InPhase’s dedicated action tracker page, enabling everyone to see which activities are in progress and which are still outstanding.

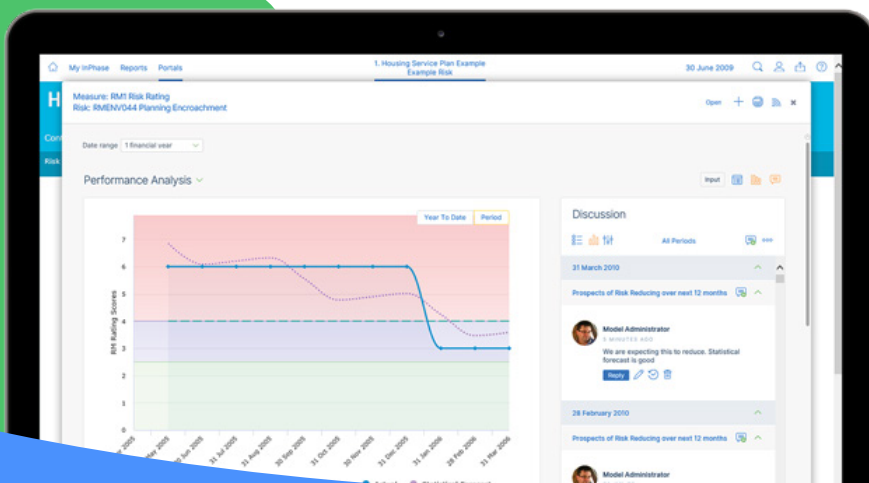

Cloud-based Freedom

Staff can record assessments, collect and upload evidence directly from mobile devices or tablets whilst evaluating the estate, or from a computer once back at their desks. And with our Microsoft Azure servers hosting everything in the cloud, you can rest assured that your data is safe and quick to access too.

InPhase’s PAM module gives you a single, easy place to review all activity, check individual audit performance statistics and supporting evidence, and reduce the resource impact of tracking regulatory requirements on the trust.

Discover a whole new way of working.
