Scheduled update to Cloud instances 14th June – 21st June

Summary

This is a service release with No Major User Interaction changes. The following detailed changes are incorporated.

Questionnaire

- Icons used to show file types in the Questionnaire
 - **Reason: easier visual recognition**
- QR Codes updated as some were generating incorrect codes.
 - **Reason: fault rectification**
- Long Text input now automatically resize to assist with viewing the content

Questionnaire Reporting

- Transposed reports use the Section reporting name, not the label.
 - **Reason: This will make it easier for users to identify the context of a question.**

Questionnaire – Building

- Links for Audits now carry warning “the link from Administrator will not attach the Audit to an Object. Use the pages provided to correctly submit Audits against the correct Object.”
- Import/Export group transforms to Excel

Criteria Builder

- Any Of filters can now be edited and existing Any Of filters unaffected.

Slicers

- Employee slicer height inconsistency fixed
 - **Reason: improved visual consistency**

Admin

- Ability to set the default Task Planning Pattern
 - **Reason: increased flexibility**
- Visualisation maintenance

Word App

- Now correctly handles sizing for pages using MM units

Perfect Ward API

- Now handles when Area division is null

LFPSE

- Good Care now includes location. This will prevent API warnings.

Known Issues

- LFPSE Risk event type – submission generates errors on NHS API. InPhase and NHS England LFPSE service in discussion and review. Planned for next service patch estimate 14 July.

Performance

- Improvements to Custom Field loading times

Accessibility

- Small adjustments to improve accessibility on buttons

Questionnaire – Data Migration Tool

- Generate report of values in InPhase. Counts, first 10 values etc
- Excel report against InPhase data checker tooling

Scheduled 31st July

- New UI with semi-automated Audit deployment scheduled for release by 31 July.
- “Stop the Clock” capability enhanced to allow users to select original date to start the clock rather than just Today.
