

# Bring your Board Assurance Framework to life

Modernise your BAF, speed up reporting and reduce improvement cycles.

Now more than ever, NHS Trusts and regulated service providers need to be able to deliver strategic objectives and manage risks whilst still maintaining excellent care quality, outcomes, patient experience and safety.

Boards need to be assured that they understand the risks to their strategic objectives, be confident that risk-related actions are effective and that identified risks are being controlled.

That's why a modernised, efficient, digital integrated Board Assurance Framework (BAF) system needs to deliver:

- ✓ Continuous real-time risk awareness
- ✓ A living, reactive framework where vital data is presented clearly
- ✓ Seamless integration with outcomes, risks, projects, controls, assurance, and actions

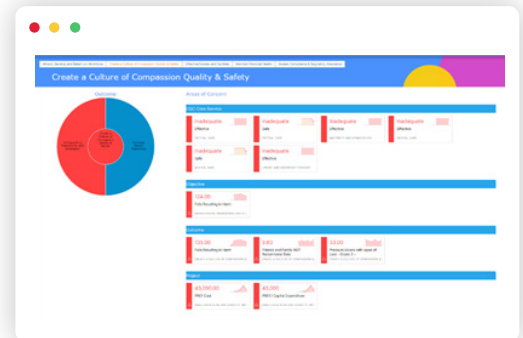

**Robert Hobbs**  
Chief Executive  
InPhase

*“ At its heart, your Trust's board assurance framework needs to deliver the right level of assurance about the right things and help you know what you actually need to know, without taking an army of administrators, risk managers, projects managers, performance managers, clinicians and senior managers to keep it live. ”*

## Break Free from Excel

Don't make your board rely on a static BAF that's been laboriously entered into Excel and that's out of date before they've even seen it. You need a living, flowing, reactive framework that automatically collates all your relevant data sources in near real-time for up-to-the minute assurance that's as accurate as possible.

## Effortless Integration

InPhase is a step-change in your digital transformation journey, turning your BAF from a stagnant, resource-heavy document into a powerful, versatile solution that effortlessly integrates your outcomes, risks, projects, controls, assurance, and actions, and presents the data clearly and visually - all with one pre-built app that delivers right out of the box.

Collate information from many third-party products via APIs, including: Datix, Ulysses, Perfect Ward, Excel, Access, and many more!

## Unparalleled Assurance - Visually

InPhase's engaging, exception-based dashboards help your board see the current state of outcomes at a glance, including current trends and all areas of potential concern from self-assessment, regulatory compliance and improvement project issues, to audits or failing action plans.

## Simply better Board assurance

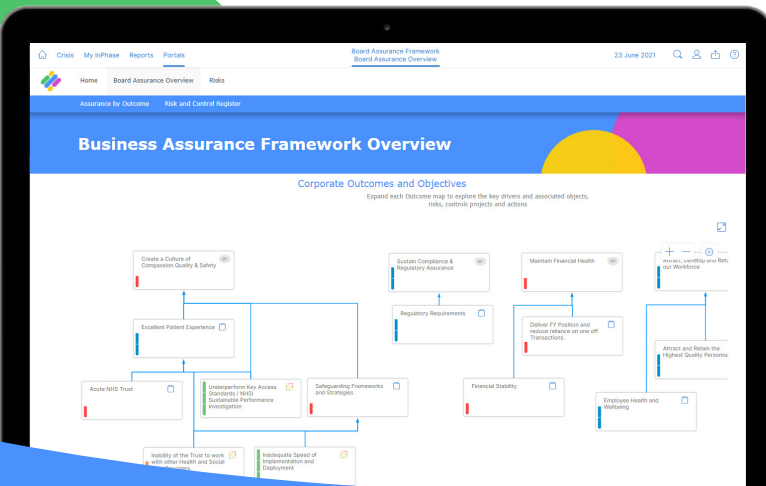

Your BAF goes to the heart of the work of your board of directors, so give them the assurance they need to successfully control risk - and do it more efficiently than ever. InPhase gives you the tools to ensure your BAF is more automated, is fit for purpose and embodies the best current practice:

- ✓ Avoid duplicated (and wasted) time and effort
- ✓ Save money and time with clear oversight of risk
- ✓ Make risk-based decisions based on solid confidence

If you want to upgrade to a more efficient, more productive BAF that delivers thorough, real-time oversight of strategic risk to outcomes founded on rock-solid assurance, contact us today.
