

Oversight.

A comprehensive suite of modular apps for oversight of health assurance and improvement

Quality

Audit

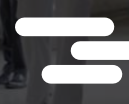

Incident

Policy

Risks

Actions

Board Assurance

and more...

Triangulate assurance. Improve.

Oversight is the result of a vision of a fully triangulated governance assurance and continuous improvement system pursued for over 30 years by InPhase.

Today that vision delivers a single Oversight for more than 20 specialist apps for healthcare organisations, in use by Acute Trusts, Community Trusts, Mental Health Trusts, private hospitals, GP practices, care homes, children and adult social care, CCG and ICB.

Care Quality Commission commends providers for their use of the **Quality Oversight** app.

NICE certifies the **Quality Oversight** app to circulate and manage **NICE Guidance**.

NHS England certifies the **Incident Oversight** app for patient safety **LFPSE, STEIS and PSIRF**.

Audit Oversight was a finalist and award winner at **HSJ Patient Safety 2021** and **Infection Prevention IPC Awards 2021** for the Wirral Care Homes SAFE IPC solution.

Meet the next generation of digital oversight systems.

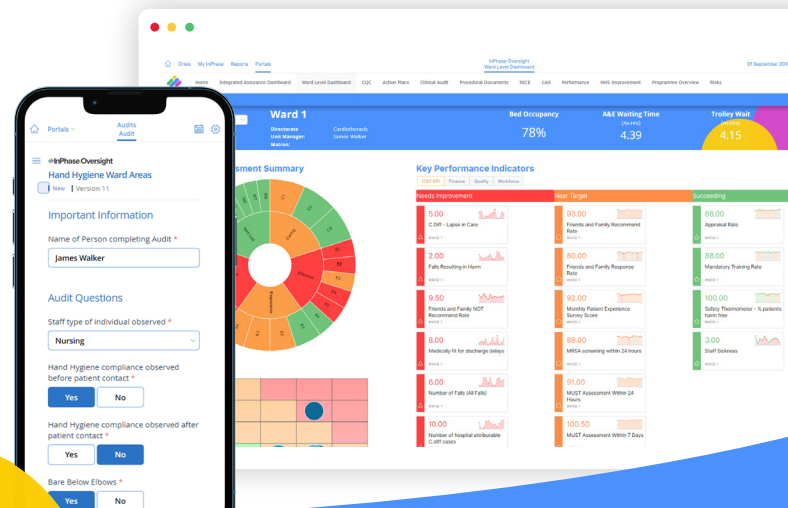

Discover how triangulation of CQC quality self-assessments, NICE compliance, policy, incidents and audits creates the ultimate single oversight patient safety focused system for robust, reliable assurance from team to ward to board.

The revolutionary Oversight system modernises day-to-day tasks and frees up staff time from burdensome administration, saving valuable clinical and non-clinical time and money.

“ So it doesn't matter whether you're a ward sister or the director of nursing you can see one version of the truth and one set of quality measures. ”

Senior Associate Director of Assurance and Compliance
County Durham and Darlington NHS Foundation Trust

Improve. Fast.

Quickly and easily create, track and report actions associated with CQC quality, NICE guidance, incidents, audits, policy, and critical quality measures to keep everyone on track towards improvement. Eliminate the need to pull data from multiple sources manually.

Instead, staff at all levels have the access they need to the information they need from any device to understand and act upon. Fast.

Quality Improvement Culture

Commit to quality, patient safety and care with one triangulated system and one truth. Follow the golden thread of assurance, inspire and motivate staff with transparent visibility and show them the precise impact of their actions. Drive all of the steps in the continuous improvement cycle with one integrated solution.

“ With Oversight everything will be in one place, meaning we don't need to pull data about the quality of care from multiple different sources. ”

Chief Nurse and Director of IPC
East and North Hertfordshire NHS Trust

“ There's been a really positive impact on culture within the trust as a result of InPhase, and I have to say that was quite unexpected, it wasn't something that we had particularly expected to happen quite so quickly. ”

Director of Nursing & Quality Improvement
Wirral Community Health and Care NHS Foundation Trust

“ Real-time. That's the big buzzword for us - real-time assurance for the site, for the region and for the group, and ultimately the board. ”
