

# Audit app

Reduce audit time and improve compliance one smart question at a time with unlimited easy-to-use audits.

Fast, friendly forms

Mobile responsive

Real-time analytics

Question management

Triangulate audits and incidents

Audit action assurance

“

There's triangulation of data, so you're able to really pull in and pull out CQC information, how your audits are meeting certain quality statements, how you are meeting against each of the audit criteria as well. So that really sold it to us in terms of a system because it was everything that we needed.

- Amy Pitcher, Quality and Compliance Manager, London Ambulance Service NHS Trust

## More completion, more accuracy, better assurance

Super simple audit forms that work on any device and only show you the relevant questions based on your previous answers make audits faster and easy to do for better completion rates and accurate results. More accurate audits, lead to better audit actions with higher impact on the areas that matter, and with Audits Oversight actions are easily added, tracked and assured.

## Boost compliance with triangulation

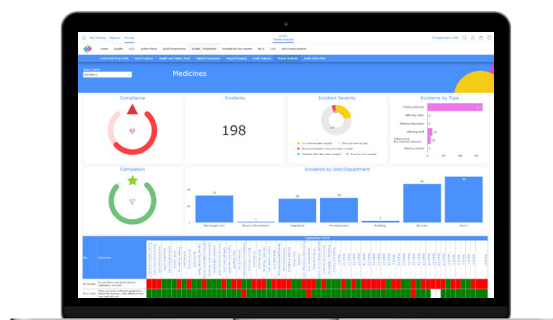

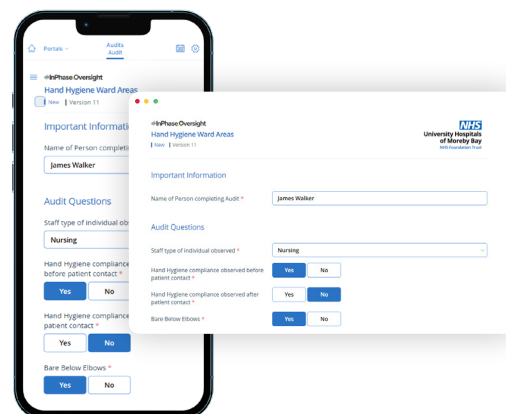

Improve audit compliance by learning where the problems are through comparisons against national benchmarks and triangulating audit results with quality, incidents, feedback, claims, risk, policies and more. You can then create and monitor improvement plans for assurance that compliance is increasing.

## Better analysis faster with built-in reports

See compliance in real-time and instantly find trends and issues with out-of-the-box dashboards that let you investigate by theme, CQC domain, question, service, ward, team or location at all levels. Filter and analyse data in dashboards for each organizational unit without spending hour building custom reports.

## Improve efficiency with smart workflows and actions

Create improvement action anywhere in the system that appears everywhere its relevant for assurance that improvement measures are underway. Make sure the right people see, review, comment or investigate audits with smart workflows and notifications so nobody has to waste time chasing information.

### Save 1,000s hours per year

Get back 0.5-4 FTE and save 1,000s hours per year at data capture stage alone. With everything in one place, it's quicker than ever to find what you're looking for.

### Unlimited customizable audits

You're in control of the questions. All audits are customizable, so you can add any questions in that you need as an organization. You can also create as many new audits as you like with no extra cost.

### Multi-level performance

Quickly understand completion and compliance gaps with organizational performance aggregation.

### Evidence for assurance

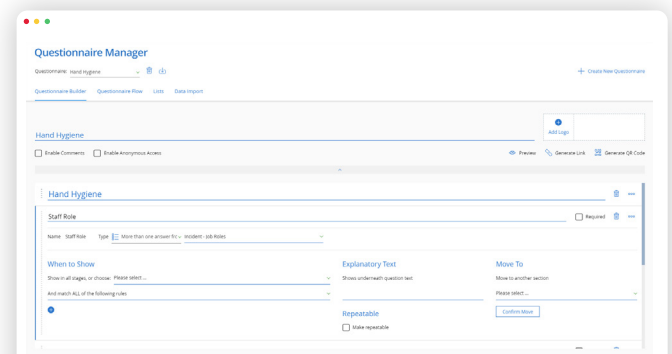

Easily enhance your audit assurance with the ability to add documents, photos and videos to any audit question even from your mobile phone.

### Save crucial audit time

Regain 0.5-4 FTE clinical time per year with the audit app's fast forms that are benchmarked to be 45% quicker than other digital systems.

- ✓ Easy-to-use, mobile-friendly forms allow teams to complete detailed audits quickly, even on the go, boosting the completion rate and consistency.
- ✓ Pre-built, real-time reports and dashboards keep you informed about audit progress and compliance status without delay, enabling immediate action.
- ✓ Link audit results with related data like quality, incidents, and CQC Frameworks to identify problem areas and ensure regulatory compliance.
- ✓ Create and manage improvement actions directly from audit results with a built-in tracker that monitors progress, due dates, and responsibilities.
