Understand what you need to do

Navigate the PSSM process from start to finish with a guided approach. Gain a detailed understanding of your responsibilities to achieve the most accurate picture of your standings and confidently report to PSOs. Ensure nothing is missed, providing actionable insights to keep your compliance strategy on track.

Know what data you need to collect

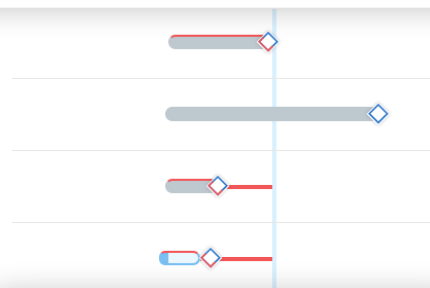

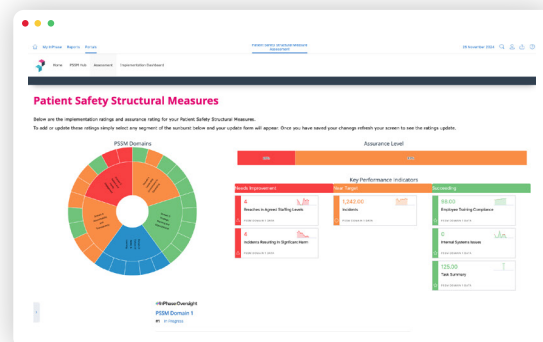

For each domain and attestation statement, understand precisely the data required to meet compliance benchmarks. Add and rate evidence effectively for assurance, ensuring you're always prepared with the right information for audits and reporting.

Stay up-to-date with your current standings

Gain a real-time overview of how your organization measures up against PSSM attestation statements. Spot performance gaps instantly and take swift action to improve, with all the necessary insights consolidated into one centralized system.

Share data across the organization

Create a single source of truth to eliminate silos and enhance transparency. Share standings, performance gaps, and improvement plans across your team. This ensures everyone knows what must be done, improving alignment and efficiency in achieving compliance goals.

Enhanced collaboration

Bring together departments through a central platform that provides a shared understanding of your organization's position against PSSM attestation statements.

Add evidence for assurance

Simplify evidence collection and assurance. Upload and store evidence instantly, rate its strength, and manage assurance effortlessly.

Aligned action management

Create tailored roadmaps, assign responsibilities, and align actions to attestation statements with a single click.

Instant oversight

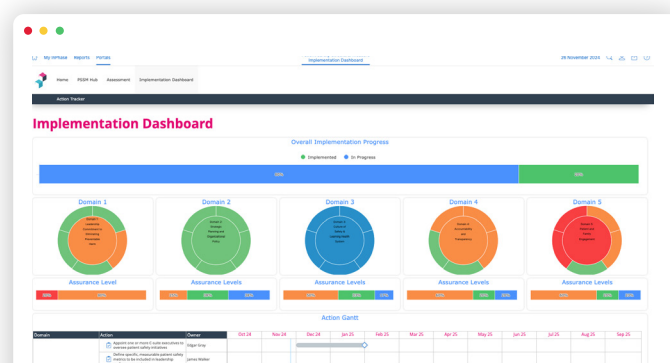

Get instant insights with visual analysis and use interactive tools to spot gaps and track progress across the PSSM framework at a glance.

Methodology rated as outstanding from the UK's Quality Commission

Ideagen InPhase software was identified as Outstanding practice by CQC under Regulation 17, as proof of using an effective governance and assurance system by CQC inspectors.

- ✓ Gain instant and real-time oversight of your organization's progress with interactive sunburst visualizations, highlighting gaps and enabling immediate action to meet Patient Safety Structural Measure framework standards
- ✓ Foster cross-departmental collaboration by providing a shared platform for a comprehensive view of PSSM compliance, streamlining communication and coordinated efforts
- ✓ Streamline assessment and action management by creating targeted roadmaps, assigning tasks with clarity, and eliminating duplication to boost efficiency and effectiveness.
- ✓ Save time on self-assessments and reporting with clear progress tracking, actionable insights, and quick data exports for PSO submissions, enhancing accuracy and consistency.
- ✓ Evidence attestation statements for each domain with a simple drag and drop feature to support your rating and provide assurance.
